

The New RealPlayer

The new RealPlayer® gives users the ability to download Internet videos from thousands of sites with just one click. RealPlayer now automatically displays a download button above non-DRM protected videos. A single click will begin the download process, allowing users to quickly build a video playlist to watch whenever they want. RealPlayer Plus also makes it possible to burn videos to DVD or transfer them to a video-capable iPod classic or iPod nano.

Video Downloading & Recording

- Downloads are fast and retain their original quality.
- No format compatibility issues - all the most popular formats are supported.
- Save time and facilitate multi-tasking by downloading multiple videos simultaneously in the background.
- Build a personal video playlist with the innovative single-click download process. Downloaded and recorded video can be viewed anytime, even offline.
- RealPlayer respects DRM and won't download DRM-protected content.

Universal Video Playback

- Plays all major video formats including Flash, Windows Media, QuickTime and RealVideo.
- Features a larger playback window for a better viewing experience.

Video Playlists

- Create and edit playlists and watch them anytime.
- Downloaded videos are stored with video thumbnails and metadata in an easy to manage library.

Improved Performance

- Quick, no-hassle installation process.
- Faster open and video playback time.
- Automatic bandwidth detection and improved firewall support.

Burn, Share & Transfer Video

- Burn videos to VCD - playable on most DVD players.
- Easily share video links with friends.
- Quickly Burn DVDs and SVCDs.*
- Transfer Web videos from thousands of sites to a video-capable iPod nano or iPod classic.*
- Simply drag-and-drop downloaded videos to compatible iPods.*
