

RealPlayer 11 for Mac

RealPlayer® 11 for Mac gives users the ability to download Internet videos from thousands of sites. The RealPlayer Downloader automatically builds a list of the Flash videos users watch and provides the option to save them with the click of a button. Consumers can watch their downloaded videos anytime or use drag-and-drop functionality to easily build a personal playlist.

Video Downloading

- Download Flash videos from thousands of Web sites.
- Video downloads are fast and retain their original quality.
- Downloadable videos are automatically added to the RealPlayer Downloader list. Videos can then be saved with the click of a button.
- Build a personal video playlist by dragging and dropping saved videos. Downloaded video can be viewed anytime, even offline.
- RealPlayer respects DRM and won't download DRM-protected content.

Universal Video Playback

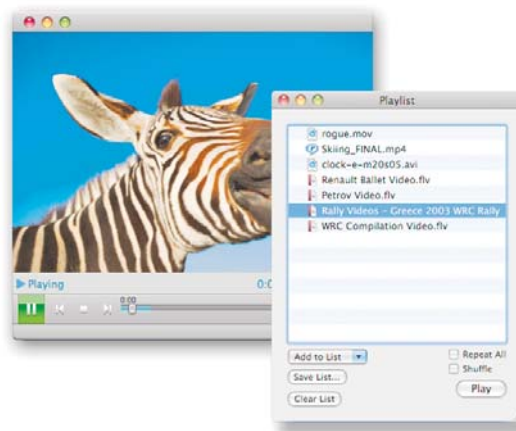

- Play all major video formats including Flash, Windows Media, QuickTime and RealVideo.
- View video clips in full-screen theater mode.
- Create and edit video and music playlists and access them anytime.
- Faster playback for streaming content with PlayNow.
- Includes PerfectPlay with LivePause to pause and seek through streaming content.
- Sound can be optimized with an included graphic equalizer.

Improved Performance

- Quick, no-hassle installation process.
- Faster open time and video playback time.
- Automatic bandwidth detection and improved firewall support.

Mac OS Integration

- Features standard Mac window chrome.
- RealPlayer Dock icon shows playback state and position of clip being played.
- RealPlayer Downloader Dock icon shows number of clips available for download
